1997 Analytical Review DWCCA-0160-PJL

Dear Ms. Peterson:

The Public Service Commission (Commission) is in the process of completing an analytical review of your utility's 1997 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that our review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. During our review of the Water Operating section footnotes we noted that you state that property owners are assessed for the costs of service additions. Please explain why there are no contributions in aid of construction for services reported in Account 271, page F-17, for the new services reported as added during the year both in the Services schedule on page W-15 and in the Water Utility Plant in Service schedule on page W-8.

2. In reference to your comment in the water operating section footnotes regarding the pump house information that would not print on the schedule, our program staff are currently discussing a change to the program which would alleviate this problem. Thank you for bringing this issue to our attention.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198.

Please respond within 30 days of this letter. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

Peter J. Leege
